Dear Applicant,

RE: APPLICATION FOR POSTPONEMENT OF COMPLIANCE TIME-FRAMES WITH NATIONAL ENVIRONMENTAL MANAGEMENT: AIR QUALITY ACT 39 OF 2004 S21 MINIMUM EMISSION STANDARDS FOR SASOL NITRO

The above-mentioned application has reference.

Your application has been processed and the National Air Quality Officer has made the decision (with the concurrence of the Atmospheric Emission Licensing Authority), as follows:

S21 Category	Appliance	Postponement Sought	Emission Standards			
			Minimum Emission Standards (mg/Nm ³)			Decision
			Pollutant	2015	2020	
Category 6: Organic Chemicals Industry	MMAN Stack	2015 – 2020	Mono-Methyl Amine	10	10	The application for postponement of compliance timeframes is declined as emission reports submitted to the Licensing Authority and the National Air Quality Officer indicate that the facility is operating in compliance with the minimum emission standards for existing and new plant. The requirement to comply with the minimum emission standards thus remains in place.

** All minimum emission standards are expressed on a daily average basis, under normal conditions of 273 K, 101.3 KPa, 10% oxygen and dry gas.

Thank you for the co-operation in matters regarding your application.

TNM

Yours sincerely,
