

Motivation for the Postponement of Compliance Timeframes in terms of Regulation 11 of Section 21 NEM:AQA Minimum Emission Standards, for Sasol South Africa (Pty) Ltd. Operations in Sasolburg

COMMENT AND RESPONSE REPORT

This Comments and Response Report (CRR) records the comments expressed by Interested and Affected Parties (I&APs) during the Public Participation process followed for the Sasol South Africa (Pty) Limited (Sasol) Operations in Sasolburg.

Comments were received in writing (comment forms, online comment forms and emails). Participants at the open days held on the 21 and 23 January 2019 at the Boiketlong Hall and Zamdela Multipurpose Centre respectively were asked to complete comment forms to document their input and assistance with capturing comments on the comment forms was provided.

The comments have been tabulated as follows. Where appropriate, responses from the Sasol and SRK Consulting (South Africa) (Pty) Ltd. (SRK) project team members have been provided.

Appendix 2: Public Meeting Attendance Registers

NO	COMMENTS RAISED BY STAKEHOLDERS	STAKEHOLDER NAME	ORGANISATION/ COMMUNITY	DATE	SOURCE	RESPONSE
1	Indicated an interest in opening a fuel station in Zamdela and asked for the opportunity to present his business proposal to Sasol.	TSHIDISO MOREKI	COMMUNITY MEMBER	23/01/2019	Public Open Day	Mr. Thabiso Molefe at Sasol Energy should be contacted at 082 898 7133 regarding opportunities related to Sasol Service stations.
2	Noted the importance of engaging with I&AP's as opposed to councillors (politicians). He indicated the importance of staff environmental training as he indicated they would convey the message to friends and family. He requested that competitions and capacity building programs be created and implemented by Sasol around Air Quality.	ISAAC MAKUME	Metsimaholo Community Association	23/01/2019	Public Open Day	Sasol has a duty to engage with both the local Council and I&AP's. Environmental aspects do form part of the SHE induction for Sasol sites. Corporate Affairs together with the Air Quality Offset Implementation Plan Team plan to launch training for school learners, teachers and the general public in the near future.
3	Indicated that as an NGO they use the following approaches to improve air quality awareness: <ul style="list-style-type: none"> • Digital billboards • Video clips on social media. • Charts at day care /crèche aimed at children. • Competitions • Community engagement through CBO's and NGO's 	THOKOZANE NHLAPHO	Metsimaholo Community Association	23/01/2019	Public Open Day	Noted, this will be considered in future information sharing processes.
4	Queried the impact of urbanisation on air quality. Noted that despite individuals moving away from rural areas burning fuel in homes remains prevalent. He queried the role of the municipality in addressing domestic fuel burning. Finally, he queried the impacts of farming on local communities.	JONAS TLADI	Personal Capacity(SASOL)	23/01/2019	Public Open Day	Sasol recognises the significant contribution of domestic fuel burning to the air shed in the Vaal priority area in which its facilities are located. The impact of agricultural activities on ambient air quality and initiatives by the municipality to address poor air quality are documented in the Fezile Dabi District Municipality Air Quality Management Plan.
5	Queried employment opportunities and recommended that radio announcements	MAHLOMOLA MOTALE	S/VILLE	23/01/2019	Public Open Day	Loud hailing was used to notify individuals of the meeting. The use of radio announcements will be considered for future participation processes;

NO	COMMENTS RAISED BY STAKEHOLDERS	STAKEHOLDER NAME	ORGANISATION/ COMMUNITY	DATE	SOURCE	RESPONSE
	and loud hailing be used to notify individuals of meetings.					however such options are limited with the closure of the local radio station Karabo FM.
6	Noted that the presentation was informative and assisted in understanding why an application was required. Raised concern around timeframes for implementation being feasible given the challenges in constructing new equipment.	SAM MTHEMBU	MCAC Metsimaholo Community Association	23/01/2019	Public Open Day	Based on the extensive work undertaken already, Sasol is confident it can successfully implement its air quality compliance roadmap within the timeframes specified.
7	Noted that the MES postponements applications cannot and should not be even considered by the NAQO as the geographical area within which the application is sought is not in material compliance with the national ambient air quality standards for pollutant or pollutants being applied for.	Rico Euripidou	GroundWork - Friends of the Earth South Africa	15/02/2019	Email	As confirmed by independent air pollution assessments, Sasol's emissions alone do not cause exceedances of the national ambient air quality standards. These assessments highlight that the key air quality issue in the vicinity of our plants is high ambient concentrations of particulate matter (including smoke), where the use of domestic fuels such as coal and wood in residential areas, is also an important source of poor air quality as is especially evident during winter. This is exacerbated by other activities such as waste burning.
8	The legality of the amendment of the SO ₂ limit for solid fuel combustion installations is questioned and it is indicated that the Minister of Environmental Affairs to withdraw this unlawful amendment or face legal action.					Sasol notes the comment. Sasol confirms that its postponement application is based on and aligned with the provisions of the MES. Sasol cannot comment on the views and the associated legal challenges and recommendations made.
9	Submit that SASOL and NATREF have had ample time to plan for and retrofit their respective plants since 2010 and more accurately since the negotiations for the MES began leading up to the promulgation of the MES.					Since the on-set of the development of the Minimum Emission standards prior to 2010 Sasol already indicated that the time frame required for compliance with the Minimum Emission Standards is between 15 and 20 years. Sasol could only commence with technical investigations to examine emission abatement options, with a firm scope being set, when the

NO	COMMENTS RAISED BY STAKEHOLDERS	STAKEHOLDER NAME	ORGANISATION/ COMMUNITY	DATE	SOURCE	RESPONSE
						standards were finalised. Therefore, technology design basis decisions could not be taken prior to the finalisation of the Minimum Emission Standards, and hence projects could not (in most instances) be advanced further, prior to that. Given the finalization of standards through promulgated amendments in November 2013, Sasol could only then continue with its investigations into compliance solutions, and comprehensively assess compliance implications. Further postponements are however required in some instances where preferred alternatives were not successful, or technology was not available in time to meet the 2020 deadline.
10	Concerns are raised regarding the alternative emission limits being applied for.					The alternative emission values have been developed utilising statistical analysis of all valid emission data to our disposal for a specific point source. The outcome reflects the most conservative operating level, while being mindful of, and allowing for normal operational variability associated with changes in feedstock (input) composition and quality. As is also indicated within the Motivation report, the true alternative limits can only be confirmed after the optimisation of the current technology has occurred. The current limit values are proposed as a worst-case scenario.
11	SASOL and NATREFs emit very significant volumes of SO ₂ and NO _x , in addition to PM. The overall findings of the AIR neglect the fact that SO ₂ and NO _x , as primary pollutants, are also transformed through chemical and physical processes in the atmosphere, to secondary PM _{2.5} . This formation contributes significantly to total ambient PM _{2.5} . Groundwork indicated that the dispersion models selected to assess the					The CALPUFF dispersion includes parameterized chemistry modules for the formation of secondary sulfate and nitrate from the oxidation of the emitted primary pollutants, SO ₂ and NO _x . For this study, the model calculated the rate of transformation of both SO ₂ to sulphates (SO ₄) and the rate of transformation of NO _x to NO ₃ (nitrates) based on environmental conditions including the ozone concentration, atmospheric stability, solar radiation, relative

NO	COMMENTS RAISED BY STAKEHOLDERS	STAKEHOLDER NAME	ORGANISATION/ COMMUNITY	DATE	SOURCE	RESPONSE
	air quality impact must be capable of modelling both dispersion and chemical transformation (photochemical) processes and should include the modelling of SO ₂ and NO _x emissions.					<p>humidity, and the plume NO_x concentration. Thereafter the modelled total particulate matter (PM) concentrations was calculated summing primary PM and secondary PM (sulfate and nitrate). The ambient air quality impacts for both particulate fractions (i.e. PM₁₀ and PM_{2.5}) thus need to be considered. Simulated concentrations of particulate matter (PM) are conservatively assumed to be PM_{2.5} since it is not possible to establish the PM_{2.5}/PM₁₀ split.</p> <p>Thus the modelled simulated concentrations of particulate matter (PM) are very conservative in that they account for both sulphates and nitrates and are conservatively assumed to be PM_{2.5} since it is not possible to establish the PM_{2.5}/PM₁₀ split.</p>
As the open days for Sasol and Natref were held together the comments made on the Natref Comment forms are provided below as they may relate to both applications.						
N1	Queried the purpose of the new technology and employment opportunities arising from its installation. He suggested that Radio announcements be used to notify communities of meetings.	MAHLOMOLA MOTALE	Community member	23/01/2019		<ul style="list-style-type: none"> The purpose of the Sulfur Recovery Unit (SRU) is to reduce Sulfur dioxide emissions from the Natref Refinery. The installation of the additional equipment will be done using existing onsite resources however if there are further opportunities for external resources, Natref would follow appropriate sourcing channels. <p>The use of radio announcements will be considered for future participation processes.</p>
N2	Queried how long Natref had been applying for postponements and queried the benefits to communities of postponements. In relation to this, concern was noted regarding retrenchments should the facilities close. He asked however, given Natref's small contribution to pollutants, whether Natref is required to improve further.	SAM MTHEMBU	MCA	23/01/2019		<ul style="list-style-type: none"> Natref applied for postponement in 2014 ahead of the 2015 compliance timeframe prescribed in the MES. In some instances, only a 3 year postponement was granted necessitating another application in 2017. Natref is now preparing to submit a postponement application ahead of the 2020 compliance timeframe where more stringent

NO	COMMENTS RAISED BY STAKEHOLDERS	STAKEHOLDER NAME	ORGANISATION/ COMMUNITY	DATE	SOURCE	RESPONSE
						<p>new plant standards are being imposed on existing plants.</p> <ul style="list-style-type: none"> At this stage Natref does not anticipate retrenchments as a result of the MES compliance. <p>1. Natref will continue to reduce its emissions through the implementation of their onsite air quality improvement roadmaps.</p>
N3	Queried SASOL and NATREF interventions to address community health issues related to air quality.	SELLO ISAAC BOOI	Community member	23/01/2019		<ul style="list-style-type: none"> Natref participates in CSI initiatives via Sasol. One of the main social investment pillars includes the protection of the environment. Natref has a detailed air quality improvement roadmap that addresses initiatives within the factory fence to improve ambient air quality. <p>2. In addition, Natref has an offset implementation programme for air quality improvement.</p>
N4	Noted air quality concerns and the temporal nature of pollutant concentrations.	PETER TSIETSI MOFOKENG	Community member	23/01/2019		3.
N5	Noted that they were now informed regarding the postponement process and the implications of the application. Reiterated however the impact on the community due to poor air quality.	CYNTHIA DLAMINI	Community member	23/01/2019		4.
N6	Requested assistance in establishing an orphanage in Zamdela	MATHAPELO MOKOENA	Community member	23/01/2019		<p>5. Sasol has an extensive Social Investment program administered through the Sasol Siyakha Fund – more information can be obtained through the Sasol website www.sasol.com or from info.esd@sasol.com</p>

NO	COMMENTS RAISED BY STAKEHOLDERS	STAKEHOLDER NAME	ORGANISATION/ COMMUNITY	DATE	SOURCE	RESPONSE
N7	Indicated that community members affected by poor air quality deserve compensation. He indicated that Sasol and Natref should take responsibility.	MZIMKHULU MBONGO	Community member	23/01/2019		<ul style="list-style-type: none"> The NAAQS provide the ambient pollutant concentration levels for tolerable or permissible to human health. As confirmed by the independently compiled air impact reports contained in the postponement application, Natref's emissions do not exceed the NAAQS. This is furthermore supported by the fact that Natref operates on the basis of its atmospheric emissions licence (AEL), which was granted taking into account the facility's impacts on ambient air quality. <p>6. Based on these assessments, Natref has identified that a significant concern in the vicinity of our plants is high ambient concentrations of particulate matter (including smoke), especially evident during winter as a result of domestic coal and wood burning, and also from waste burning in some areas. It is for this reason that Natref supports an offset mechanism to bring about sustainable air quality improvements by addressing non-industrial sources of emissions, in line with the overarching objective of the NEM: AQA.</p>

Subject: RE: Reminder: Sasol 2019 Postponement Application: Availability of the Draft Motivation Report & AIR for comment & details of the public open day
Importance: High

Dear Philippa

I am sorry for the belated comments – as we discussed we have been inundated with MES postponements applications recently all being finalised towards the same deadline, however thank you for the opportunity to submit some general comments on behalf of groundWork, Friends of the Earth South Africa which has been working on national Air Quality issues since its inception in 1999. In this short time available I have managed to look over and comment in general on the motivation reports provided.

As you know, postponement applications can only be granted if the geographical area within which the application is sought is in material compliance with the national ambient air quality standards for pollutant or pollutants being applied for. The Highveld and Vaal Priority Areas are both NOT in compliance with the ambient air quality standards and for this reason alone this postponement applications by both SASOL and NATREF should be rejected by the National Air Quality officer.

Also, we note that in terms of the Air Quality Act and regulations, the applications have to:

- 1) be submitted by 31 March 2019;
- 2) an atmospheric impact assessment has to be submitted;
- 3) public participation process concluded;
- 4) detailed justification provided;
- 5) Furthermore SASOL and NATREF have to show that **their current and proposed air emissions are not causing, and will not cause any adverse impacts on the surrounding environment;**
- 6) Additionally SASOL and NATREF must also show they are in compliance with other emission limits but cannot comply with a particular pollutant or pollutants.
- 7) Finally both applications **must demonstrate previous reduction in emissions of the said pollutant or pollutants,** measures and direct investments implemented towards compliance with the relevant new plant standards.

Alternative standards can only be granted if

- (i) there is material compliance with the national ambient air quality standards in the area for pollutant or pollutants applied for^[1]
- (ii) or (ii) the Atmospheric Impact Report does not show a material increased health risk where there is no ambient air quality standard.

On the basis of points 1 above we submit that the MES postponements applications cannot and should not be even considered by the NAQO.

Furthermore the amended List of Activities also includes the following amendment specific to existing plants' compliance with new plant MES for SO₂:

Amendment of Category 1 of the List

6. Subcategory 1.1 of Category 1 of the List is hereby amended by the addition of the following special arrangement under subparagraph (a):

"(iii) Existing plants shall comply with a new plant emission standard of 1000 mg/Nm³ for sulphur dioxide (SO₂)."

We point out that no amendments to sub-category 1.1 of the List of Activities (which sets out the MES for solid fuel combustion installations), were included in the proposed amendments to the List of Activities for comment. We note further that the effect of this amendment doubles the permissible SO₂ emissions - from 500mg/Nm³ to 1000mg/Nm³ - in respect of existing plants that are solid-fuel combustion installations.

We have disputed – and continue to dispute - the legality of this amendment which was not the subject of public participation as required by section 57(2)(b) of the AQA, which specifically requires that any amendment made available for comment must "*contain sufficient information to enable members of the public to submit meaningful representations or objections*". In the circumstances, we have called upon the Minister of Environmental Affairs to withdraw this unlawful amendment, or face legal action.

Even before the unlawful amendment, South Africa's MES were already very weak, even compared to other developing countries. For instance, the previous SO₂ existing plant/2015 MES were 17.5 times weaker than those in China, Germany, and the European Union (EU), nearly 6 times weaker than India's, almost 5 times weaker than Indonesia's, and almost double as lax as Thailand's.^[2] The recent amendments would only serve to deepen this inequality and worsen the impacts of air pollution in South Africa, through effectively "doubling" the SO₂ MES limit (and making it twice as weak).

The primary reason provided by SASOL "*for the application for postponement by SO is quite simply that sufficient time is required for both the retrofitting of the abatement technology and the process optimisation that has to follow to ensure that the abatement technology is effective in meeting the MES new plant standards*". In this respect we submit that

SASOL and NATREF have had ample time to plan for and retrofit their respective plants since 2010 and more accurately since the negotiations for the MES began leading up to the promulgation of the MES.

Table 6-1 and Table 6-2: Proposed alternative emission limits for the postponement period requested for Steam Station 1 & Steam Station 2 request an almost doubling of the MES for NOx and PM.

In the SASOL application Table 6-3: Proposed alternative emission limits for the postponement period requested for the thermal oxidation plant – the alternative limits sought are in some case up to 60 times in excess than the MES – this is simply staggering and beggars belief that SASOL can demonstrate previous reduction efforts in emissions of the said pollutant or pollutants listed in this table.

We submit that SASOL and NATREFs emit very significant volumes of SO2 and NOx, in addition to PM. The overall findings of the AIR neglect the fact that SO2 and NOx, as primary pollutants, are also transformed through chemical and physical processes in the atmosphere, to secondary PM2.5. This formation contributes significantly to total ambient PM2.5. We submit that the dispersion models selected to assess the air quality impact must be capable of modelling both dispersion and chemical transformation (photochemical) processes, and should include the modelling of SO2 and NOx emissions.

As agreed please append our general comments to the final documents submitted to the DEA.

Sincerely

Rico Euripidou

Dear Rico

Our discussions this morning refer,

I have consulted Sasol and Natref who have agreed to your request to submit comments today.

I also note that the links to the website I sent are working and that you have been able to access the documents.

Should you have any queries please do not hesitate to contact me.

Kind Regards

Because I am the president of the community organisation in Tanderburg and also the pastor of A.M.E Church.				
Comments (Use a separate sheet if you wish to)				
Sasol and Mafaf they can influence their workers to pass the message to their families after the induction. And again they can start to make communities and programs regarding this Air pollution. And you must try to call the stakeholders not the politicians.				
<p>Philippa Burmeister / Romi Bellusci</p> <p>Postal Address: PO Box 1969, Westville, 3630</p> <p>Tel: +27(0)31 279 1200</p> <p>Fax: +27(0)31 279 1204</p> <p>Email: pburmeister@srk.co.za / rbellusci@srk.co.za</p>				
Please note that by registering as an I&AP you consent to:				
<ul style="list-style-type: none"> receiving further communications regarding the postponement application process; the relevant personal information being stored on an I&AP database; in the event that an appeal is lodged, that the I&AP database and the personal information contained therein may need to be submitted to a third party; and that the personal information will be utilised for notifications related to Public Participation processes associated with the application and any appeals should they be lodged.

Comments (Use a separate sheet if you wish to)

people from farms move to urban locations but continue making fires at their homes thus increasing pollution. What is the role of the municipality in this?

Impacts of farming on local communities
