

Workshop: Key Elements of Mine Water Management and Slope Stability

May 21 - 22 | Workinton Next Level | Ankara, Turkey

Learn about effective mine water management and geotechnical design through all phases of a mining project. This 1.5-day workshop will work through open pit and underground mine dewatering, slope stability, pore pressure depressurization and most importantly, cost saving opportunities while ensuring safety.

Space is limited - reserve your spot today!

Registration: email info@srkturkiye.com for more info.

Price: 300 TL by May 1st | 400 TL after May 1st

Topics to be discussed:

- Smart data collection for hydrogeological and geotechnical technical studies, design and operations
- Operational geotechnical / hydrogeological support
- Pit slope stability and optimization modeling
- Numerical groundwater modeling
- Mine dewatering
- Slope depressurization
- Geotechnical design implementation, monitoring and optimization

Audience:

- Geotechnical / Rock Mechanics Engineers
- Hydrogeologists
- Exploration / Mine Geologists
- Open Pit Mine Engineers
- Mining Technical Services
- Mining Consultants
- Environmental Engineers

Instructors:

Vladimir Ugorets
Principal Consultant
Hydrogeology
vugorets@srk.com
SRK Denver

Goktug Evin
Senior Consultant
Hydrogeology
